

The Students' Association of Natural Science, Uppsala
Geological Division

(Geologiska sektionen av Naturvetenskapliga studentsällskapet i Uppsala)

Meeting November 10, 1956.

14 persons present.

Lecture by Mr. ROBERT VON ENZMANN: "Orbicular rocks of the Kheis geosynclinal system, Namaqualand, South Africa."

Meeting November 29, 1956.

13 persons present.

Lecture by Professor ASTRID CLEVE VON EULER: "Sandarna, age and settlement."

Meeting December 18, 1956.

16 persons present.

Lecture by Dr. BERTIL DAHLMAN: "The uraniferous alum shale of Sweden."

Meeting March 8, 1957.

24 persons present.

Lecture and demonstration by Mr. ERIC STÅHL: "Sampling and preparation of glacial clays in plastics."

Lecture by Mr. BUSTER SUND: "Joints and ground water in solid rocks."

Meeting March 29, 1957.

21 persons present.

Lecture by Dr. ERIK ERIKSSON: "Geochemical aspects of the circulation of marine salt in nature."

Meeting April 12, 1957.

19 persons present.

Lecture by Dr. BROR WIDELAND: "Determinations of gravitation."

Meeting April 26, 1957.

28 persons present.

Lecture by Dr. K. GÖSTA ERIKSSON: "Recent research on the postglacial climate of India and the Mediterranean countries."
