

The Students' Association of Natural Science, Upsala.

Geological Division.

Meeting January 23d, 1941.

The following officers were appointed:

Mr. B. COLLINI, Secretary.

Mr. E. ÅHMAN, Treasurer.

Meeting January 30th, 1941.

Mr P. H. LUNDEGÅRDH read a paper on »The bytownite of the anorthosite from the islet of Bönskär in Central Roslagen».

Mr. B. COLLINI made a summary upon the contents of a recent paper by Dr. HENNO MARTIN: »Die postarchaische Tektonik im südl. Mittelschweden».

Meeting February 13th, 1941.

The Geological Division 70 years old. The secretary made a few remarks as to the significance of the present meeting and recorded historical-statistical interpretations by Prof. Dr. C. WIMAN and himself.

Afterwards, Prof. Dr. R. SERNANDER gave numerous spiritual and elucidating »Glimpses from the oldest history of the Geological Division».

Meeting February 27th, 1941.

Dr. ASTRID CLEVE-EULER spoke of »Late-Quaternary states of regression within Finland».

Meeting March 20th, 1941.

Prof. Dr. HANS CLOOS read a paper on »Struktur und Funktion von Tuffschloten».

Meeting April 17th, 1941.

Dr. N. G. HÖRNER made »Some remarks as to the physical geography of the Chinese Quaternary».

Meeting May 6th, 1941.

Dr. PER THORSLUND spoke of »The boundary dividing Ordovician and Silurian in Jemtland».

Meeting September 24th, 1941.

The following officers were appointed:

Mr. B. WÆRN, Secretary.

Mr. P. H. LUNDEGÅRDH, Treasurer.

Meeting October 9th, 1941.

Dr. NILS AMBOLT, out of his experience, gave an answer to the question: »Are there any petroleum and salt deposits to be found in Scania?»

Meeting October 28th, 1941.

Prof. Dr. H. G. BACKLUND offered »Some points of view as to ore development and deposition in the Precambrian of Fennoscandia».

Meeting November 24th, 1941.

Mr. IVAR HESSLAND read a paper »On the origin and biological sense of the shell deposits within SW Sweden».

Meeting November 28th, 1941.

Prof. Dr. H. G. BACKLUND discussed »The possibility of getting geological trends when prospecting ores».

Meeting January 28th, 1942.

The following officers were appointed:

Mr. B. WÆRN, Secretary.

Mr. P. H. LUNDEGÅRDH, Treasurer.

Meeting February 12th, 1942.

Mr. S. LANDERGREN offered »The geochemical points of view as to the origin of the Grängesberg iron ore».

Meeting February 19th, 1942.

Dr. ASTRID CLEVE-EULER read a paper on »The puzzle of the Baltic ice lake».

Meeting March 12th, 1942.

Dr. C. CALDENIUS summarized the results of »Studies on Gotiglacial ice borders and glacier beds within Halland».

Meeting April 9th, 1942.

Mrs. EBBA HULT DE GEER spoke of »The planetary chronology of tree rings and clay varves».

Meeting April 23d, 1942.

Mr. B. WÆRN read a paper on »The *Retiolites*-bearing strata of Dalecarlia».

Meeting October 1st, 1942.

The following officers were appointed:

Mr. P. H. LUNDEGÅRDH, Secretary.

Mr. E. ÅHMAN, Treasurer.

Meeting October 28th, 1942.

Dr. T. KROKSTRÖM gave »An example of boudinage and granitization in the vicinity of Västervik».

Dr. B. BOHLIN described »A new locality of so-called *stromatolithic* limestone.

Meeting November 9th, 1942.

Mr. IVAR HESSLAND recorded »Some observations as to the distribution of particles in marine medium».

Mr. B. COLLINI spoke »A little about the eolian materials within the Nahuel Huapi region in Northern Patagonia».

Meeting December 10th, 1942.

Dr. T. KROKSTRÖM made »A few marginal remarks as to the optic determination diagrams of pyroxenes».

Mr. P. H. LUNDEGÅRDH described »A new occurrence of allanite in Central Roslagen».
